SEROLOGY

HIV I & II

Parameter Name	Result	Unit	Fixed Range Text
HIV - I	Non Reactive		
HIV - II	Non Reactive		

Note:
"Basically a rapid screening method is designed to carry out initial screening as well as in case where, there is time constraint, having sensitivity & specificity more then 99% claimed by manufacturers. Generally acceptable for the purpose. It is based on immunochromatographic principle.
Sample reactive on initial testing must be re-tested. Those that are positive on repeat test are presumed positive. Those negatives on retest are termed as non-repeatedly reactive. This false reactivity could be due to contamination of sample or small fibrin threads.
However, before firm clinical opinions are made when it is clinically desirable, confirmatory tests like WESTERN BLOT/ PCR for HIV I & II are recommended.

HBsAG

Parameter Name	Result	Unit	Fixed Range Text
